

The XDXL62003 Series are high-voltage, high-current darlington drivers comprised of seven NPN darlington pairs. All units feature integral clamp diodes for switching inductive loads.

Applications include relay, hammer, lamp and display (LED) drivers.

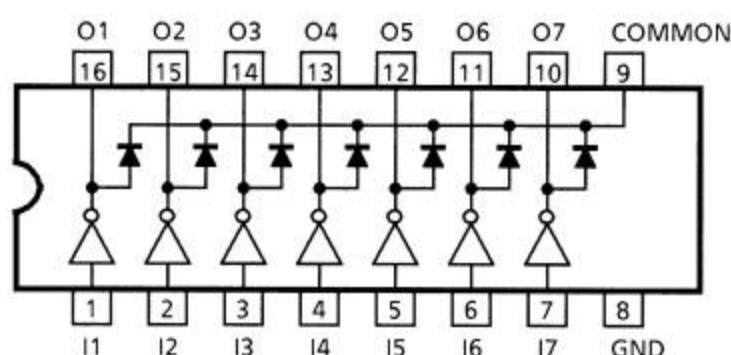

The suffix (G) appended to the part number represents a Lead (Pb)-Free product.

Features

- Output current (single output): 500 mA max
- High sustaining voltage output: 50 V min
- Output clamp diodes
- Inputs compatible with various types of logic

Precautions for Using

This IC does not include built-in protection circuits for excess current or overvoltage.
 If this IC is subjected to excess current or overvoltage, it may be destroyed.
 Hence, the utmost care must be taken when systems which incorporate this IC are designed.
 Utmost care is necessary in the design of the output line, COMMON and GND line since IC may be destroyed due to short-circuit between outputs, air contamination fault, or fault by improper grounding.
